ANUJ NEGI

Software Developer

Dehradun, India | +91 8267055378 | anujnegi9997@gmail.com | linkedin.com/in/anuj-negi09 | github.com/anujnegi09

SUMMARY

Full-stack developer experienced in React.js, Node.js, and MongoDB — from building secure authentication and payment flows to designing responsive UIs. Currently strengthening frontend and responsive UI skills through a software development internship.

EDUCATION

Master of Computer Applications (MCA) — Ongoing (Online) *2026-Present*

Swami Rama Himalayan University, Dehradun (NAAC A+ Grade)

Bachelor of Computer Applications (BCA) *2023 – 2026*

Swami Rama Himalayan University, Dehradun (NAAC A+ Grade) | CGPA: 7/10 | 6 semesters completed, degree in progress

EXPERIENCE

Quon Labs (OPC) Pvt. Ltd. — Software Development Intern *July 2026 – Present*

Remote

- Building and practicing responsive React.js interfaces, strengthening component-based UI development skills.
- Developing hands-on experience with Node.js, Express.js, REST APIs, and JWT-based authentication through applied technical exercises.
- Using Git/GitHub for version control and GitHub Actions for CI workflows, while strengthening debugging and API integration skills in a remote engineering environment.

PROJECTS

Fixora — Local Skill Hub | fixora-xxyt.onrender.com | github.com/anujnegi09/Fixora

Full-Stack Developer | Node.js, Express.js, React.js, MongoDB Atlas

- Built a local services marketplace where users can create, publish, browse, and book services from local providers, with dedicated flows for customers and providers.
- Implemented Google OAuth alongside JWT-based authentication (access + refresh tokens), giving users a one-click sign-up option while keeping sessions secure across all API endpoints.
- Designed an OTP-based booking verification flow using Redis, requiring providers to enter a time-bound OTP before a booking can be marked complete.
- Gated service publishing behind a monthly subscription, integrating Razorpay to handle recurring billing for active subscribers.
- Built real-time notifications via Socket.IO, and designed a normalized MongoDB Atlas schema across users, services, and bookings with indexing for efficient queries.

Dehradun Land Use Land Cover (LULC) Change Detection | github.com/anujnegi09/dehradun-lulc-change-detection

Google Earth Engine | JavaScript

- Built a land-cover classification and change-detection pipeline in Google Earth Engine, comparing Landsat 7 (2014) and Landsat 9 (2024) imagery across Dehradun district.
- Classified land into Water, Urban, Forest, and Barren Land using Random Forest and CART classifiers, achieving 99.78%/99.56% (RF) and 100% (CART) accuracy across both years.
- Quantified a decade of land-cover change: water bodies grew by 2,971 hectares, while forest, urban, and barren land declined by 1,383, 963, and 624 hectares respectively.

TECHNICAL SKILLS

- Languages: JavaScript, Python, Java, SQL
- Core CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, RESTful API Design, System Design
- Web & Backend: React.js, Node.js, Express.js, Next.js, Tailwind CSS, Socket.IO
- Databases & Cloud: MongoDB, MySQL, MongoDB Atlas, Redis, Cloudinary
- Auth & Payments: JWT, OAuth 2.0 (Google), Payment Gateway (Razorpay)
- Tools & Practices: Git/GitHub, Postman (API Testing), Multer

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Foundations Associate — Oracle, Oct 2025
- Generative AI Mastermind — Outskill, 2025
